

Professional Summary

Computer Science graduate with hands-on experience in Python, SQL, machine learning, data analytics, and Generative AI. Skilled in data cleaning, EDA, feature engineering, predictive modeling, model evaluation, dashboard development, RAG, LLM applications, and Text-to-SQL. Built end-to-end projects in AI-powered analytics, forecasting, recommendation systems, and business intelligence. Seeking entry-level opportunities in AI/ML Engineering, Data Science, GenAI Development, AI Analytics, or Data Analytics.

Technical Skills

Programming: Python, SQL, MySQL, Pandas, NumPy **Analytics:** Data Cleaning, EDA, Statistical Analysis, KPI Reporting
Visualization: Power BI, Tableau, Excel, Matplotlib, Plotly, Streamlit
Machine Learning: Regression, Classification, Clustering, Recommendation Systems, Forecasting, Model Evaluation, Hyperparameter Tuning, Scikit-learn, XGBoost
Deep Learning: TensorFlow, Keras, LSTM, GRU **GenAI:** LLMs, Gemini API, LangChain, RAG, Prompt Engineering, ChromaDB, Vector Search, BM25
AI Engineering: Text-to-SQL, SQLite, SHAP, Explainable AI, AI Workflows, Automated Reporting **Tools:** Git, GitHub, Jupyter, Google Colab, Flask

Experience

Data Science Intern

AI Variant, Bangalore | Remote/On-site

Jun 2025 – Mar 2026

- Used Python, SQL, Pandas, and EDA to clean, transform, and prepare datasets for analytics and machine learning.
- Developed Power BI and Tableau dashboards for KPI monitoring, business reporting, and data-driven insights.
- Built and evaluated forecasting and recommendation models using feature engineering and hyperparameter tuning.
- Used Git, GitHub, Jupyter Notebook, and Google Colab for experimentation, collaboration, and documentation.

Projects

Enterprise AI Data Analyst Platform

Python, Streamlit, LangChain, Gemini, ChromaDB, SQLite, Scikit-learn, SHAP

2026

GitHub

- Built an AI analytics platform supporting CSV, Excel, Parquet, and JSON ingestion, profiling, cleaning, EDA, and business insights.
- Implemented RAG with LangChain, Gemini, and ChromaDB for dataset-grounded natural-language question answering.
- Developed read-only Text-to-SQL, Random Forest forecasting, SHAP explainability, dashboards, and report exports.

Industrial IoT Analytics Platform

Python, SQL, Pandas, Plotly, Streamlit, Machine Learning

2026

GitHub

- Developed an industrial sensor analytics platform for data preparation, anomaly detection, equipment health analysis, and KPI monitoring.
- Created interactive dashboards and visualizations for operational monitoring and equipment performance analysis.

Bike Sales Analysis Dashboard

SQL, Excel, Tableau

2026

GitHub

- Queried the BikeStores relational database using SQL joins and aggregations for business analysis.
- Built a Tableau dashboard analyzing approximately \$8.5M revenue, 7,000+ orders, and 1,400+ customers.
- Identified revenue patterns by product, state, store, and year, and developed business recommendations.

Apple Stock Price Forecasting Platform

Python, Pandas, XGBoost, TensorFlow, Scikit-learn, Streamlit

2026

GitHub

- Developed forecasting workflows using ARIMA, SARIMA, XGBoost, LSTM, and GRU models.
- Performed feature engineering, stationarity testing, and MAE/RMSE-based model evaluation.
- Built a Streamlit application for EDA, diagnostics, model selection, and multi-day forecasting.

Education

B.Tech in Computer Science and Engineering

Vidya Academy of Science and Technology, Thrissur

APJ Abdul Kalam Technological University

2021 – 2025

Certifications

- NASSCOM Masters Program in Data Science – Gold (86%)
- Deloitte Data Analytics Job Simulation – Forage
- ExcelR Data Science Programme – Certificate of Excellence
- Coursera Advanced Data Visualization
